

# **All about...**

## **Cactus Pete and his Smelly Feet**

**Cactus Pete's family came from  
A hot country with desert heat  
Where the sun shines constantly  
And it rains only a tiny little bit.**

**But the Cactus Petes are fine  
With just a little water they grow  
They collect moisture with their spikes  
The smartest plants you will ever know.**

**Now, Cactus Pete lives in pot  
Faraway in a cold country  
But he is not homesick because  
He is loved by his human family.**

**But his human family loves him too much!  
They kept on watering Cactus Pete**

**No, no, no, please stop, cried Cactus Pete  
The water is getting to my feet!**

**Oh Cactus Pete, they said  
Why do you have smelly feet.**

**\*&%\$\*!!!, swore Cactus Pete.  
Your watering is  
Rotting my feet!**

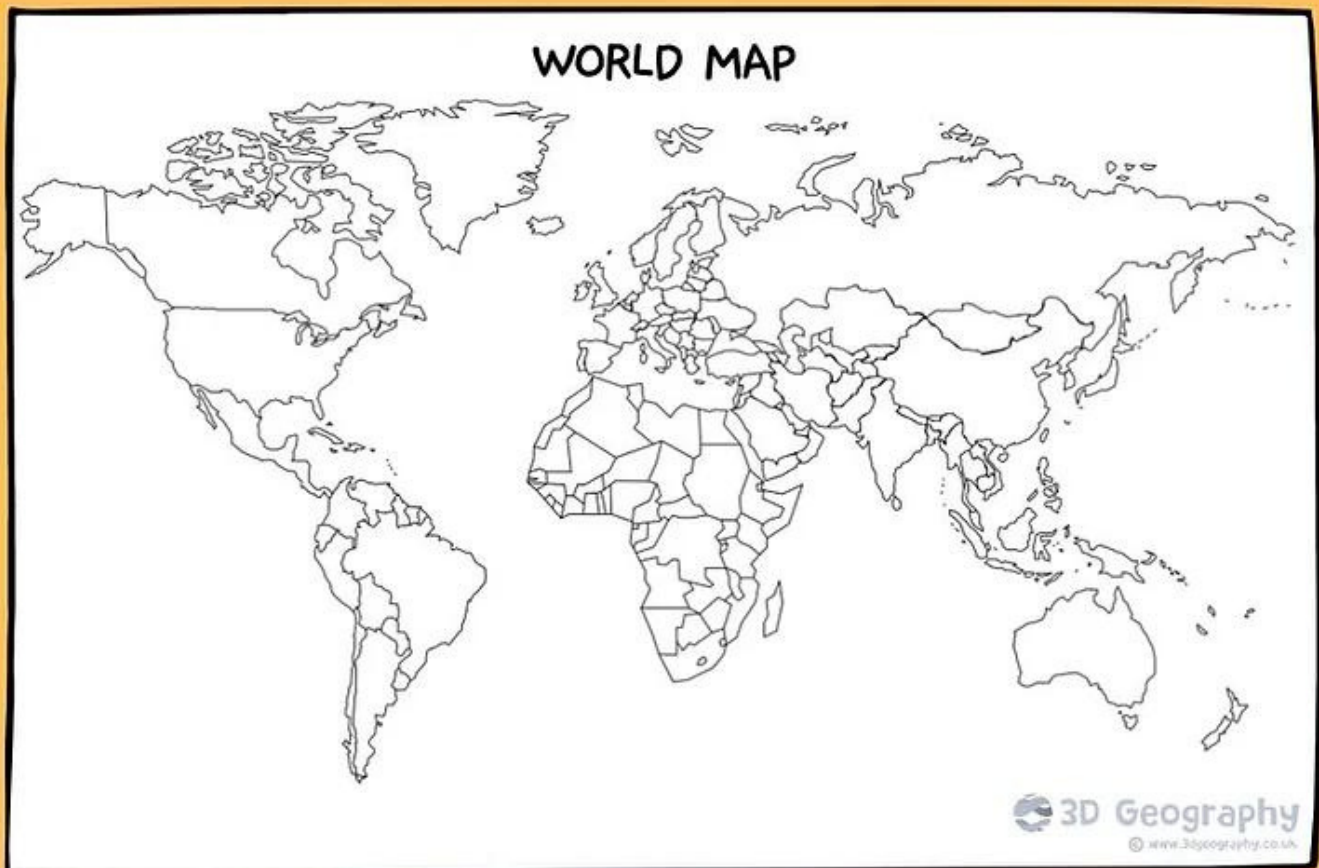

## Cactus Care

1. Do not overwater your cactus!
2. Use a cactus mix instead of compost (if possible)
- 3.3. Make sure there is lots of drainage in the pot - put pebbles in the bottom of the pot and mix into the compost.
- 4.4. Make sure your cactus gets a lot of sun!

Mark on the map below: (1) where Cactus Pete's family came from, and (2) where your Cactus Pete now lives

There are many different types of cacti in the world! These are a few for you to colour.  
Use the blank sheet to draw more or to write a funny rhyme about them.
